A presentation

2022 | Tashkent

WHY RENAISSANCE?

Educating Professionals

2022

Founded

3

Faculties

32

Study directions

300+

Faculty members

The university focuses on training competitive, in-demand specialists through:

Practice-oriented learning

Real projects, not just theory.

Modern AI & digital skills

Focus on future technologies.

International standards

Global partnerships (incl. China).

In-demand professions

Careers with strong market demand.

CURRICULUM

Subjects & Technologies

KEY SUBJECTS

Artificial Intelligence

Programming

Machine Learning

Deep Learning

Project Management

Database Management

AI Systems

Intelligent Systems

TECHNOLOGIES TAUGHT

ChatGPT & Claude Code

AI assistants for learning and coding.

Moodle & LMS

Online courses and course management.

Interactive boards

Engaging, live lessons.

Higgsfield (AI media)

AI-generated video and visual content.

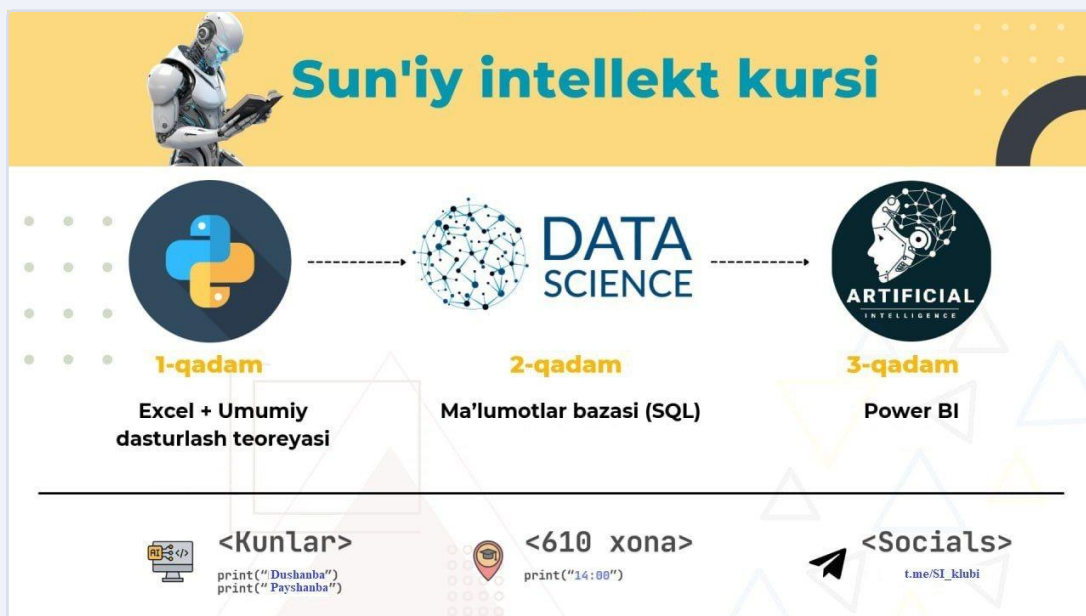

Python · SQL · Power BI

Data science and analytics stack.

AI & Programming Club

Where students learn artificial intelligence and build real projects together.

Structured AI course

Python → Databases (SQL) → Power BI.

Weekly sessions

Monday & Thursday, 14:00 · Room 610.

Real projects

Students publish live web & AI projects.

Cyber Sport Club

A club for esports enthusiasts — competition, strategy and teamwork.

Team competitions

Regular esports tournaments.

Strategy & reaction

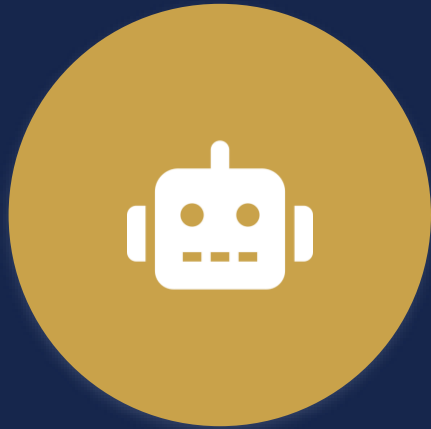

Sharpening tactical thinking.

Teamwork

Building strong, coordinated teams.

Robotics Club

Design. Build. Program.

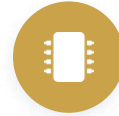

Hands-on robotics and automation

Students design and program robots, working hands-on with modern hardware and automation technologies.

Robot building

Assembling and wiring robots.

Sensors & controllers

Working with microcontrollers.

Programming

Coding robot behavior and logic.

Competitions

Taking part in robotics contests.

Projects in Practice

Dential.uz — Clinic CRM

Author: Odilxonov Muhammad

A management system that automates operations for medical clinics.

MyWorkers

Author: Ibrohimov Ilyosbek

A platform connecting skilled professionals with jobs (backend implemented).

Live student projects from the AI Club

dilrozbegim.github.io/RenessansNavruzi · renessans-edu.netlify.app · astounding-capybara-5aee3d.netlify.app

ACHIEVEMENTS

Our Students' Achievements

Uzum Hackathon

Our students achieved top places at the Uzum Hackathon.

Team: Ibrohimov Ilyosbek, O'rolov Asadbek, Shukrillayeva Dilrozbegim, Odilxonov Muhammad, Bekmirzayev Behruz

Global Game Jam 2026

Students took part in Global Game Jam 2026 (School 21, January 26–28, 2026), showing strong results in game development.

Thank you!
